Planning & Urban Design  
Structural Engineering

The Town of Petrolia and the Bluewater Health Charlotte Eleanor Englehart Hospital (CEEH) collaborated on a unique planning project. Instead of working in isolation, the Town and the Hospital both understood the potential of creating a plan that considers community wellbeing first, and determined that by working together they would have a greater positive impact on Petrolia and the surrounding region. The Petrolia / CEEH Master Plan has two focus areas: first is the Town of Petrolia and its physical environment, which will lead to a Community Master Plan; and, the second focus area is the CEEH, which will lead to a Hospital Master Plan.
