ICE District is a 25-acre mixed-use development in the heart of Downtown Edmonton that combines sports, entertainment, residential, hotel, office space, and retail, all centred around a public plaza. This project has transformed the area—its location along a busy thoroughfare is unrecognizable from the dusty parking lots that bordered the street just a few years ago—and kickstarted a new wave of investment in Edmonton. DIALOG's collaborating with design teams on 9 out of 13 major components of ICE District Phase One.
